## DID YOU KNOW?

Right now we are moving at 66,700 mph, this is the speed at which the earth orbits the Sun.

The Sun's volume is big enough to hold more than 1.3 million Earths.

Mars has the largest mountain in the Solar System named Olympus Mons. It is 26 km high, almost 3 times taller than Mt. Everest!

The Earth spins faster on its axis in September than it does in March!

Far and away, the coldest temperature ever measured on Earth was -129 Fahrenheit (-89 Celsius) at Vostok, Antarctica, on July 21, 1983.

The closest Star to Earth is about 23.5 trillion miles away.
